EDUCATION

Vellore Institute of Technology

B. Tech. in Computer Science Engineering — CGPA: 8.44

Vellore, Tamil Nadu

September 2022 – June 2026

Delhi Public School

Senior Secondary Education (CBSE) — Percentage: 81.4

Patna, Bihar

April 2020 – March 2022

Delhi Public School

High School Education (CBSE) — Percentage: 82.8

Patna, Bihar

April 2018 – March 2020

SKILLS

Programming Languages: Java, Python

Frontend Development: HTML, CSS, JavaScript, React.js, Responsive UI, Tailwind CSS

Backend Development: Node.js, Express.js, REST APIs, API Development, JWT Authentication

Databases: MongoDB, MySQL

Machine Learning: TensorFlow, Scikit-learn, Pandas, NumPy, Deep Learning, Computer Vision

Developer Tools: Git, GitHub, Postman, VS Code, Jupyter Notebook, Google Colab

Core CS Concepts: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, Database Management Systems, Software Development, Agile Methodologies

EXPERIENCE

AI & Data Science Trainee

June 2025 - July 2025

C-DAC Patna

Patna, Bihar

- Built and evaluated supervised and unsupervised learning models using Python, Scikit-learn, Pandas, and NumPy.
- Boosted model accuracy by 20% through advanced preprocessing, feature engineering, and evaluation techniques.
- Gained hands-on experience in ML workflows, from data cleaning to model deployment, securing Grade A certification.

PROJECTS

AgriPred: Rice Disease Detection System | [Live](#) | [IEEE](#) | Tech Stack: Python, TensorFlow, Flask, Pandas, NumPy [GitHub](#)

- Built a deep learning-based rice disease classification system trained on 10,000+ images covering 10 disease categories.
- Improved prediction accuracy to 90% through image preprocessing, data augmentation, and hyperparameter optimization techniques.
- Implemented a Flask-based web application on Render for real-time disease detection and crop health recommendations.

AutoXperio: Garage Management Platform | [Live](#) | Tech Stack: Node.js, Express.js, MongoDB, JavaScript, Git [GitHub](#)

- Built a full-stack garage management platform using Node.js, Express.js, MongoDB, and REST APIs to automate booking, billing, and inventory workflows.
- Integrated role-based dashboards with analytics and automated monthly restocking (+100 units/product).
- Engineered scalable REST APIs with MongoDB integration, supporting real-time workshop operations.

Code Review Assistant | [Live](#) | Tech Stack: Node.js, Express.js, Tailwind CSS, Google Gemini API [GitHub](#)

- Developed a full-stack AI web application using Google Gemini API to perform automated reviews for 5+ programming languages, analyzing code quality, performance, and security.
- Enabled both paste and file uploads (.py, .java, .js, .cpp, .txt) with real-time structured feedback and 4 severity levels (Critical–Info).
- Delivered a modern Tailwind CSS frontend and secure Node.js backend supporting 100+ daily code reviews.

CERTIFICATIONS & INVOLVEMENTS

- Microsoft Azure AI Fundamentals (AI-900)** - Scored 904/1000, demonstrating proficiency in Artificial Intelligence, Machine Learning, Computer Vision, NLP and Azure AI Services.
- Core Committee Member, Standards Club (BIS, Govt. of India)** - Organized workshops and awareness programs promoting quality standards and industry best practices among students.
